

## Internship - Filter Testing in Multi Purpose Vacuum Cleaners

Kärcher is the world's leading provider of cleaning solutions with around 13,500 employees in 72 countries and an innovative product offer for commercial and domestic customers alike. Renowned for our innovation, over 90% of our products have been developed in the past 5 years. We owe this success to our employees, their skills, dedication, ideas and commitment. Constant investment in R&D, quality, marketing and design make us a well-known brand and a most attractive employer to develop your career with. Do you want to be part of our growth story?

Extraordinary tasks require extraordinary people. From March 2022 we are offering you the chance of a six-month internship at our **CER Cleaning Equipment production site in Curtea des Argeş in Romania**. A vacuum cleaner is only ever as good as its filter. Support the development of our multi purpose vacuum cleaners and apply now!

### What are your tasks?

- Let's find out together, how we can reduce the filter pressure drop in our innovative wet and dry vacuum cleaners.
- In close collaboration with our development teams at our HQ in Germany as well as with the experts from our production site in Romania you will develop innovative solutions.
- Based on your theoretical know-how, you will create a concept (including a functional prototype) for cleaning the filters.
- Moreover, you will evaluate the different approaches in a suitable matrix and also keep an eye on the costs.
- Last but not least, you will receive valuable input from our Product Management regarding the product usability.

### What do you bring to the table?

- You are currently studying in the field of climate system technology, mechanical engineering or industrial engineering with focus on fluid mechanics, thermodynamics, air conditioning, ventilation and building system technology or plastics mechanics - either in a bachelor or master degree program.
- With a great deal of commitment, you develop new concepts, evaluate different approaches and develop functional models.
- You have a very good command of German and English in combination with strong communication skills. Knowledge of Romanian is an advantage, but by no means a must.
- Intercultural competence, an analytical mindset and a spirit of innovation round off your profile. We will teach you everything else.

### What do we have to offer?

- An onboarding program designed for your needs to prepare you for the challenges in the international Kärcher business.
- Various product trainings and intercultural training sessions.
- We take care of your accommodation, travel organization and support you financially.
- We will introduce you to key stakeholders within the Kärcher Group, who will be on hand with help and advice for you. We are looking forward to learning from your experiences that you can share during target orientated events with us.
- Take advantage of the opportunity and grow your professional global network.

### Bring the WOW to your career!

Upload your CV online and share your contact details with us. We welcome applications from people with disabilities, whose integration is of particular concern to us. We are looking forward to exploring your talents!
