

Ford Romania Intern Program Internship Workplan

Function Name:	PTM	Supervisor Name:	Sergi Hervas
Department Name:	Assembly PTO	Supervisor CDSID:	shervas
Assignment Location:	Craiova	Supervisor Position#:	Assy PTM
Project Description			

Generate a very user friendly data base in Windows (Word, Excel, Access), for helping the operators to report the daily:

- Hot-run and dock audit engines results with a standard description and information, including the possibility of adding documents and pictures for better understanding and follow-up the issues.
- The data base should be easy to use queries and able to report a painter chart.
- Study the possibility to be linked with the Railhofer results/equipment.

Measurable Objectives

- Database for both proposes (Hot-run, Dock Audit and Second Dock Audit) performed by the Assembly Team.
- Standardize the Non Conformities comments/defects for both controls.

Expected Major Contributions

- Support the team in improving FTT due to fast and easy investigation of the non-conformities due to assembly issues/error or suppliers.
- Come with “fresh eyes” and new ideas.

Expected Benefits to Intern

- Get knowledge production environment, quality systems and procedures used in automotive companies.
- Cross functional exposure to a wide variety of manufacturing and business related activities.
- Be a part of a Global team working on cross functional activities and interactions.

Intern Qualifications (schooling, work experience, major)

- Must be studying for Engineering related degree.
- Good English and MS Office skills required.
- Demonstrate ability to work with others in a team environment.
- Good problem solving skills & self-motivated.
