

Workshop - related aspects of urban logistics in the project DOROTHY - FP7

On the 24 October 2014 in Craiova the Organizer University of Craiova – Faculty of Mechanics - Department of Vehicles and Transportation in collaboration with the co-organizers SC IPA SA, AROTT, Urban Control Systems and Society of Automotive Engineers of Romania has organized an Urban Logistics Workshop focused on Urban Logistics & Good Practices.

Discussions were stemmed from the innovative electrical solution with possibilities to use them in the city center and to the new ways of urban management based on new and innovative traffic solutions.

The Workshop aimed to provide a platform for exchange and discussion based on the experience of universities and research companies, the needs, interests and challenges of different target groups and end-users and implementers and possible additional and future strategies for enhanced energy-efficient urban distribution solutions

Speakers and guests representing different groups of end-users and implementers as well as experts were invited to share their experiences and perspectives. Hence, key Urban Logistics stakeholders, Logistics services providers, public officials, researchers, etc., discussed key issues related to Urban Logistics & Good Practices, including technical assessment considerations, the transferability potential to other cities, the sustainability of different solutions etc.

The project DOROTHY was presented as an important and innovative solution to the current market demands. The cluster formed within the DOROTHY project was the main topic of discussions of the next phase of the presentation.
