

## Brokerage Event in Modern Vehicles Technology and Transport

On the 23 October 2014 the University of Craiova – Faculty of Mechanics - Department of Vehicles and Transportation in collaboration together with the co-organizers SC IPA SA, AROTT, Urban Control Systems and Society of Automotive Engineers of Romania organized the Brokerage Event in Modern Vehicles Technology and Transport.

At the brokerage participated about 80 peoples representing companies from Romania and abroad that participated at some events.

The Brokerage Event in Modern Vehicles Technology and Transport was realized as a an advanced tool dedicated for setting up new partnerships and for launching new collaborative project proposals for the University of Craiova and all the attendance at the brokerage. It was a way to strengthen the cooperation between Romanian industries and research units and to give to Romanian organizations a simple, direct and accessible way to find partners all around the country.

This brokerage event was considered as an appropriate place for the partners from the University of Craiova to present themselves, to show to others participants their expertise and their collaborative project ideas. Also within this event the project DOROTHY was disseminated together with the DOROTHY Cluster as a tool to exchange knowledge and knowhow with other national and international entities.
